Remember What McCarthy Said?

Remember the late and great Senator McCarthy of Wisconsin and his charges against the Central Intelligence Agency, and the United States State Department? Well, he charged these two agencies of the United States Government as being riddled with Communists and communism from top to bottom. The truth will come out. Have you read what the last Russian KGB agent, Yuri Nossenko, who defected to the United States and was given political asylum in this country has said: "There are Russian Agents operating in the State Department and in the CIA. And in high positions." Also, the former ranking Polish KGB agent, "Michael Goleniewski" has said: "There are Communists operating in both the State Department and the CIA." Now I ask you is this not proof enough that Senator McCarthy of Wisconsin was right? Yes, he knew what he was talking about and it might be to the advantage of all of us to listen to some of our elected senators and representatives when they warn us about having subversive communist agents in our United States Government.
